Hello! My name is Faiq Najib Al-Aziz. I studied Information Systems at Institut Teknologi Sepuluh Nopember. I have professional experience as an Information Technology Developer at Bank Mega from 2020 to 2022. I have expertise in UiPath RPA and the PHP Laravel framework. I have an interest in back-end web development.

## **Work Experience**

# Information Technology DeveloperBank MegaNov 2020–Feb 2022Treasury & Int'l Banking System teamJakarta, Indonesia

PT Bank Mega Tbk provides a wide range of banking products and services in Indonesia and is owned by the business tycoon Chairul Tanjung through CT Corp. My job responsibilities include:

- Increasing the Treasury and International Banking System process time by up to 300% by implementing Robot Processing Automation (UiPath) in applications like Spreadsheet, web apps, and Spectrum Treasury System.
- Help to develop the Bank Mega API website using Laravel–MySQL stack, including landing page, documentation, registration, back office, dashboard, and API simulation.

### **Radio Frequency Engineer Intern**

#### PT. Velacom Indonesia

Jul 2017-Aug 2017

Radio Frequency Team

Surabaya, Indonesia

PT. Velacom Indonesia specializes in engineering services for cellular networks. My internship responsibilities are:

- Perform evaluations of cellular signal quality, encompassing both voice and cellular data, through indoor and outdoor assessments across various cities within the East Java province.
- Compiling the report based on the analysis of the cellular signal testing results.
